ANNUAL REPORT
OF THE
COMMISSIONER OF PATENTS
FOR THE YEAR
1914

WASHINGTON
GOVERNMENT PRINTING OFFICE

1915

REPORT

OF THE

COMMISSIONER OF PATENTS

TO CONGRESS

FOR THE YEAR ENDED DECEMBER 31, 1914.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., January 30, 1915.

To the Senate and House of Representatives of the United States of America in Congress assembled:

In compliance with section 494 of the Revised Statutes I have the honor to submit the following report of the business of the Patent Office for the year ended December 31, 1914:

RECEIPTS.

Detailed statement of all moneys received for patents, for copies of records or drawings, or from any source whatever.

Applications:	
Cash received.....	\$1,942,062.00
Cash refunded.....	6,201.66
Net cash.....	1,933,860.34
Certificates of deposit.....	58,006.00
Total cash and certificates.....	1,993,866.34
Copies:	
Cash received.....	202,476.44
Cash refunded.....	3,984.68
Net cash.....	198,491.76
Certificates of deposit.....	1,264.45
Total cash and certificates.....	199,756.21
Recording assignments:	
Cash received.....	33,973.37
Cash refunded.....	1,536.60
Net cash.....	32,436.77
Certificates of deposit.....	113.50
Total cash and certificates.....	32,550.27
Registration of prints and labels:	
Cash received.....	8,515.00
Cash refunded.....	804.00
Net cash.....	7,711.00
Certificates of deposit.....	24.00
Total cash and certificates.....	7,735.00
Court costs:	
Cash received.....	25.00
Cash refunded.....	
Net cash.....	25.00
Certificates of deposit.....	
Total cash and certificates.....	25.00
Aggregates.	
Cash received.....	2,187,051.81
Cash refunded.....	12,526.94
Net cash.....	2,174,524.87
Certificates of deposit.....	59,407.95
Total cash and certificates.....	2,233,932.82
Receipts from sale of Official Gazette and other publications through Government Printing Office.....	17,960.00
Grand total.....	2,251,892.82

EXPENDITURES.

Amounts expended under the several appropriations from Jan. 1 to Dec. 31, 1914.

Salaries.....	\$1,307,092.13
Scientific library.....	2,275.02
Stationery.....	10,820.05
Postage on foreign matter.....	1,070.00
Furniture, carpets, ice, telephones, washing towels, and sundries.....	8,606.04
Law library.....	380.95
Photolithographing:	
Current issue.....	42,025.36
Reproductions.....	55,991.45
Photographic copies.....	5,019.56
Photostat supplies.....	2,535.62
Foreign patents.....	14,872.49
Paid Public Printer for old specifications.....	6,732.13
Printing and binding:	
Official Gazette, with indexes.....	164,565.30
Specifications.....	343,048.45
Miscellaneous.....	35,069.82
Defending suits.....	665.75
Total.....	2,000,770.12

RECEIPTS AND EXPENDITURES.

Receipts from all sources.....	\$2,251,892.82
Expenditures.....	2,000,770.12
Surplus.....	251,122.70
<i>Surplus earnings of the Patent Office, deposited in the Treasury of the United States.</i>	
Amount of total net surplus in Treasury, Jan. 1, 1914..	\$7,297,052.46
Net surplus for the year 1914.....	251,122.70
Total net surplus, Dec. 31, 1914.....	7,548,175.16

SUMMARY OF THE BUSINESS OF THE PATENT OFFICE.

Applications for patents for inventions.....	67,774
Applications for patents for designs.....	2,454
Applications for reissues of patents.....	176
Total.....	70,404
Applications for registration of trade-marks.....	8,851
Applications for registration of labels.....	988
Applications for registration of prints.....	434
Disclaimers filed.....	22
Appeals on the merits.....	1,840
Total.....	12,135
Patents issued, excluding designs.....	39,945
Design patents issued.....	1,715
Patents reissued.....	190
Total.....	41,850
Trade-marks registered.....	6,817
Labels registered.....	719
Prints registered.....	338
Total.....	7,874
Patents expired during the year.....	22,098
Applications forfeited for nonpayment of final fees.....	10,022
Applications allowed, awaiting final fees.....	19,152
Trade-mark applications passed for publication.....	7,948

In 1914 there were received 67,774 applications for mechanical patents, 2,454 applications for design patents, 176 applications for reissues of patents, 8,851 applications for registration of trade-marks, 988 applications for registration of labels, and 434 applications for registration of prints. There were 41,660 patents issued, including designs, 190 patents reissued, and 6,817 trade-marks, 719 labels, and 338 prints registered. The number of patents that expired was 22,098. The number of allowed applications awaiting the payment of final fees was 19,152, and the number forfeited for non-payment of the final fees was 10,022. The number of notices of allowance written from January 1 to June 30 was 28,868, and from July 1 to December 31 27,601, making a total of 56,469. The total number of notices of allowance written in 1913 was 42,399. The increase of allowances in 1914 over 1913 was 14,070.

In proportion to population more patents were issued to citizens of Connecticut than to those of any other State—1 to every 947. Next in order are the following: District of Columbia, 1 to every 973; California, 1 to every 1,271; New Jersey, 1 to every 1,344; Massachusetts, 1 to every 1,381; Illinois, 1 to every 1,426; New York, 1 to every 1,526; Rhode Island, 1 to every 1,554; Colorado, 1 to every 1,795; Ohio, 1 to every 1,803; Michigan, 1 to every 1,974; Oregon, 1 to every 1,996; Washington, 1 to every 2,028; Pennsylvania, 1 to every 2,209; Montana, 1 to every 2,523; Nevada, 1 to every 2,558; Arizona, 1 to every 2,724; Utah, 1 to every 2,850; Missouri, 1 to every 2,853; Iowa, 1 to every 2,918; Minnesota, 1 to every 3,126; Delaware, 1 to every 3,211; Wyoming, 1 to every 3,243; Maryland, 1 to every 3,254; Indiana, 1 to every 3,293; Wisconsin, 1 to every 3,414; New Hampshire, 1 to every 3,472; Nebraska, 1 to every 3,558; North Dakota, 1 to every 3,562; Idaho, 1 to every 3,876; South Dakota, 1 to every 3,918; Kansas, 1 to every 3,932; Vermont, 1 to every 4,449; Maine, 1 to every 4,949; West Virginia, 1 to every 5,130; Florida, 1 to every 5,263; Oklahoma, 1 to every 5,675; Texas, 1 to every

6,294; Hawaii, 1 to every 6,396; Virginia, 1 to every 6,895; New Mexico, 1 to every 7,273; Louisiana, 1 to every 8,365; Tennessee, 1 to every 8,601, and Kentucky, 1 to every 9,423. The fewest patents granted in proportion to the number of inhabitants were in the following States and Territories: Philippine Islands, 1 to every 848,381; Porto Rico, 1 to every 279,503; South Carolina, 1 to every 16,406; Mississippi, 1 to every 15,627; Alaska, 1 to every 12,871; Arkansas, 1 to every 11,749; North Carolina, 1 to every 11,673; Georgia, 1 to every 10,826, and Alabama, 1 to every 10,382.

As to foreign countries, 1,475 were granted to citizens of Germany; 1,033 to those of England; 667 to those of Canada; 379 to those of France; 152 to those of Austria-Hungary; 122 to those of Switzerland; 93 to those of Scotland; 82 to those of Sweden; 70 to those of Italy; 60 to those of New Zealand; 56 to those of Belgium; 44 to those of Victoria; 40 to those of New South Wales; 38 to those of Norway; 37 to those of Russia; 32 to those of Denmark; 26 to those of Mexico; 25 to those of Ireland; 23 to those of the Netherlands; 20 to those of Cuba; 13 each to those of Argentina, Japan, and Transvaal; 10 to those of Spain; 9 to those of South Australia; 8 each to those of Wales and West Australia; 6 to those of Brazil; 4 to those of Queensland; 3 each to those of Bermuda, Chile, Guatemala, and Luxemburg; 2 each to those of Bulgaria, Dutch East Indies, India, Java, Natal, and Rhodesia; 1 each to those of Bahama Islands, British East Indies, Canary Islands, Cape Colony, China, Finland, Greece, Nicaragua, Portugal, Portuguese East Africa, Roumania, Tasmania, and Uruguay.

OTHER DETAILS OF BUSINESS.

The total net receipts of the office for the year aggregated \$2,251,892.82. During the year 206,326 amendments in pending cases were filed. The number of letters recorded, constituting the general correspondence of the office, was 276,701, an increase of 27,680 over the work of the preceding year. In addition to this 33,110 letters of inquiry were returned with circulars of information answering the questions propounded.

In the Drafting Division 1,038 drawings were made for inventors, who paid \$3,625.50 therefor; 8,001 drawings previously filed were corrected at the request of the inventors, for which the office received \$6,981.35, and 13 tracings were made, at a cost of \$32, a total of \$10,638.85 having been received as fees for work of the Drafting Division. Drawings to the value of \$187 were made for the use of the office, and 6,433 drawings were corrected as to minor particulars without charge to the inventors.

In connection with the work of the Assignment Division 29,409 deeds, containing 13,312,500 words and averaging 453 words per deed, transferring title to patents, etc., were recorded, for which the office made a charge of \$49,308.27, an increase of \$210.37 in the fees received last year for the same purpose. In addition to this the Assignment Division prepared 1,350 abstracts of title and 2,720 briefs relating thereto, for which fees amounting to \$1,806.90 were paid. The table on page 1 shows the receipts of only \$32,550.27 as fees for recording assignments. The difference between the amount there stated and that stated above

covers work charged to miscellaneous deposit accounts which are entered under the general head "Moneys received for copies."

Type-written copies of records to the extent of 28,872,400 words were furnished, and for this the office received \$28,872.40. For the certificates attached to such of these copies as were certified the office received \$1,287.50. In 1905 the office furnished type-written copies of records embodying 21,155,300 words, for which \$21,155.30 was paid, an increase of 36.48 per cent in the work in ten years.

Inventors and attorneys were furnished with 53,197 photographic copies of drawings, 8 x 12½, at fifteen cents each, and 4,823 photographic copies, 10 x 15, at twenty-five cents each; also, 24,051 small-sized photostat copies were furnished at fifteen cents each and 20,451 large-sized photostat copies at twenty-five cents each. In addition 5,664 small-sized photostat copies were made for the use of the office. The amounts received from the sale of photostat copies aggregated \$8,720.40.

Printed copies of the specifications and drawings of patents to the number of 2,840,818 were sold at five cents each, bringing into the office \$124,021.90 on this account, 1,014,750 copies were shipped to foreign countries in exchange, and 197,793 copies were drawn for office use. The office has completed the work of printing the specifications of patents issued prior to 1861 and is now in position to furnish a printed copy of the specification and drawing of all patents commencing with No. 1, issued July 28, 1836. The records pertaining to patents of earlier date were destroyed in the fire of December 4, 1836. Some of such patents were restored and a few have been printed.

SURPLUS.

The total receipts were \$2,251,892.82. The expenditures were \$2,000,770.12. The excess of receipts over expenditures during the calendar year ending December 31, 1914, amounts to \$251,122.70. The surplus will probably be still larger during the coming year.

There is also an accumulated surplus of \$7,548,175.16, as shown by the receipts and expenditures of the office since it was organized. In addition to this there are 50,000,000 patent copies, constituting the working sets and copies for sale of all patents heretofore issued. These have been paid for out of the receipts of the office and therefore represent an asset in addition to the accumulated surplus. As these patent copies are sold for five cents each, they have a value, based upon net income, of nearly two and one-half million dollars, so that the actual accumulated surplus of this office is \$10,000,000.

THE PATENT OFFICE BUILDING.

The crowded condition existing in this office, which has frequently been called to the attention of Congress, is steadily growing worse. The patent copies kept for sale, to the number of about forty-seven millions, are scattered all over the office. This fact increases enormously the difficulty of "pulling" them. Moreover, as they are stacked upon wooden shelves and are exposed, the danger of fire is very serious.

The Secretary of the Interior expects Congress to give him a new building, to which will be removed his office

and the General Land Office. It is believed that this building will be completed within the next two or three years. The present understanding is that when the space now occupied by those two offices is vacated by them it will be turned over to the Patent Office.

There is no doubt that much could be done to increase the safety of the employees and property of this office in case of fire. Moreover, when the projected building for the Interior Department is completed and a large part of the Land Office Building, as is now contemplated, turned over to the Patent Office, it will require considerable remodeling to make the best use of the space available. I therefore ask the Congress to appropriate \$2,500 for the preparation of plans, so that the work may be proceeded with as soon as the additional space is placed at our disposal.

PERSONNEL.

The examining corps in the Patent Office is composed of an Examiner of Classification, an Examiner of Interferences, an Examiner of Trade-Marks, two Law Examiners, forty-three Principal or Primary Examiners, and three hundred and thirty-four Assistant Examiners, of whom sixty-three are paid \$2,400 a year, seventy-three are paid \$2,100 a year, eighty-eight are paid \$1,800 a year, and one hundred and ten are paid \$1,500 a year. It will be noted that there are more Assistant Examiners receiving only \$1,500 a year than the sum-total of the Law Examiners, the Primary Examiners, and those Assistant Examiners receiving \$2,400 a year. This disproportion of the number in the lower grades to those in the higher grades slows down promotions. This has contributed materially to induce ambitious young men to leave the Office after they have been admitted to the bar.

It is urged that the examining force be reorganized in the following particulars:

1. By restoring the grades of First, Second, Third, and Fourth Assistant Examiners; and

2. By increasing the number in the higher grades and reducing the number in the lower grades, so as to make them equal.

The cost of such changes applied to the present force would be about twenty-three thousand dollars.

I have, however, asked Congress to make the number in each of the four grades eighty-six, which would increase the number of Assistant Examiners by ten, and would increase the pay-roll by about forty-two thousand dollars. The bill which, when finally passed, would accomplish this reorganization has passed the House and has been reported favorably by the Committee on Patents of the Senate.

No increase in the number of examining divisions is recommended. While it is difficult for the Primary Examiners to oversee the work of more than six or seven Assistant Examiners, as must be done now in some of the larger divisions, the advantage to be gained by reducing the number of Assistant Examiners in these large divisions must be balanced against and is believed to be outweighed by the inconvenience of increasing the number of divisions, with the consequent splitting up of the classes of invention among the different Primary Examiners. It is believed, however, that if the number of Law Examiners, who are sub-

stantially of the same rank as the Primary Examiners, were increased a large amount of needed supervisory work could be accomplished under the direction of the Commissioner. This supervisory work would be directed toward unifying the practice in the different divisions on matters of examination, interference, division, and the like, to the end that there may be a more speedy termination of the prosecution of applications and more certainty of arriving at a correct conclusion.

There are at present two Law Examiners. Since December 23, 1913, one of these Law Examiners has been engaged in considering each proposed interference with the Primary Examiner in whose division it arose and determining whether the interference should be declared or not. Heretofore the forty-three Examiners have declared interferences each according to his own judgment. This resulted in diversity of practice, and, moreover, the fear lest failure to declare an interference might be imputed to neglect led to the declaration of many unnecessary interferences.

Under the present practice the Primary Examiner is relieved of all responsibility when he reports the interference, and since one man determines the question of the declaration of interferences for all of the divisions the practice is uniform.

Of the total number of proposed interferences from December 23, 1913, to January 1, 1915, reported to the Law Examiner twenty-six per cent were rejected and in ten per cent the issues were modified. An actual reduction of 148, or thirteen per cent, in the number of interferences declared in 1914 was effected in the face of the fact that thirty-three per cent more applications were passed to issue in 1914 than in 1913. When the old applications have been disposed of, the number of interferences declared will drop still lower, to the great relief of the Office and of applicants.

After an interference is declared the parties thereto are permitted to bring motions for dissolution. These under former practice were heard by the Primary Examiner, each hearing the motions in interferences which he himself had instituted. Since May 13, 1914, all motions to dissolve have been heard by one of the Law Examiners. As the Law Examiner who determines whether the interferences shall be instituted hears no motions to dissolve this branch of the practice is relieved from the undesirable incident heretofore experienced that motions to dissolve were brought before the official who instituted the interference. Moreover, the practice is made uniform by reason of the fact that all motions to dissolve are heard by one official.

Each Primary Examiner is an expert in the classes assigned to him for examination. His knowledge enables him to know in any particular case whether the assistant has properly developed the art, and his judgment on questions of patentability is valuable in proportion with his experience and knowledge of the particular art in question. Nothing should be done to interfere with the independence of the Examiners in passing on questions of patentability, excepting as their conclusions are reviewed on appeal.

But all collateral questions arising in the Office which are of such character that they can be treated

independently of the Examiner and where the volume of business is within the capacity of one man to handle should be put under the control of a Law Examiner.

For example, requirements of division of applications, while made by the Examiners in the first instance, should not be made final without being passed upon by a Law Examiner. In this way the practice can be made uniform and the legitimate requirements of the Office enforced, while at the same time the public would be greatly relieved from vexation and expense. Other lines of supervision will be discussed elsewhere in this report. Three more Law Examiners are needed at the present time. It is believed that this number can be even somewhat further increased with advantage.

There should also be an increase of two members of the Board of Examiners-in-Chief. At present the Board consists of three members, two of whom constitute a quorum. The increase is necessary for three reasons:

1. The number of cases appealed is so large that there is more work than three men can properly dispose of, and it is increasing.

2. Where, because of the necessary absence of one member, an appeal is heard by two members, in the event of a divided Board it is the uniform practice to set down cases for rehearing before the full Board. This increases the work of the Office and the cost to the applicant. With five Examiners-in-Chief, three of whom constitute a quorum, this difficulty would be obviated.

3. The enforced absence of two members of the Board at one time suspends the work of the Board. In the event of serious and protracted illness this might result in great inconvenience. Moreover, as the members of the Board are appointed by the President, by and with the advice and consent of the Senate, the work of the Board might be crippled for a long period of time in the case of a death occurring while Congress was not in session.

It is believed that there is work enough for five men but under the statute the Examiners-in-Chief, besides hearing appeals, are required to perform such other like duties as the Commissioner may assign them, so that in the event that there should not be enough appellate work to occupy the entire time of the five members other work of a supervisory character could be assigned to them by the Commissioner.

SCIENTIFIC LIBRARY.

Our valuable library is in present need of reorganization and enlargement. The collection of books, periodicals, and foreign patents is of the utmost value to the examining corps, inventors, manufacturers, and attorneys interested in investigating the novelty of inventions, but the material is not and never has been in condition for ready reference. Much of it is practically unavailable. I have started the work of reclassifying and indexing, with a view to meeting more nearly the peculiar needs of those who use the library. This library of about seventy-five thousand volumes of scientific works and about two million foreign patents, used, as it is, by people who are doing work which is almost identical with that of the examining

corps, requires a librarian of special training and ability. General library training alone is not sufficient to enable one to understand the problems upon which those who use the library are working. The librarian should not only know library methods, but he should be trained in the art of searching. The \$2,000 salary now provided by law is insufficient pay for any one having the qualifications necessary. It is difficult to induce members of the examining corps who might be interested in library work to forego chance of advancement. The salary of the librarian should be increased to that of a Principal Examiner—\$2,700 a year—and the salary of the assistant librarians should be made to conform to those of Assistant Examiners in the different grades.

I greatly appreciate the aid rendered to this Office by the Librarian of Congress and his chief classifier looking to the reorganization of our library.

CONDITION OF THE WORK IN THE OFFICE.

On January 31, 1914, there were 28,437 applications awaiting official action. On January 30, 1915, there were 20,752, showing a decrease of about 7,600 applications. This decrease, however, was entirely in the applications which had been once acted upon and after being amended were again awaiting action by the Office. The number of applications awaiting action for the first time was on January 31, 1914, 13,411, and on January 30, 1915, 14,704, showing an increase of about thirteen hundred applications. It has been the policy to bring and keep the amended work up to date. The reasons in favor of this policy are:

1. It seems to be required by the provision of Rule 63 that applications in the same class of invention are to be

examined and disposed of as far as practicable in the order in which the respective applications are completed.

2. Prompt action on amended work is the economical way to handle applications, because whenever the attorneys act promptly time is saved which would otherwise have to be spent in rereading the applications before action is taken on amendments. As 206,000 amendments were filed during the year, the possible saving of time referred to, though not definitely ascertainable, is unquestionably large.

Now that the amended work has been brought substantially up to date, so that on the average an application is acted upon in less than two weeks from the time of the filing of the amendment, attention will be directed to reducing the accumulation of applications which are waiting their first action. At present this work on the average is in arrears nearly three months. To bring it up to date with the present force will take several years, since to attempt to handle more than ten per cent, in excess of the annual receipt of applications would encourage ill-considered actions.

The most serious aspect of the problem is that the number of applications awaiting action in the different divisions is very different and the time required to reach an application for action in different classes is very different. With average arrears of three months applications in certain classes are not reached for ten months. Generally speaking, the classes of invention in which there is the greatest activity are those in which there are the greatest delays, and delays in

applications of such classes are of special hardship. It is not practicable to transfer Assistant Examiners freely from one class to another, since the acquisition of knowledge of a class is a slow and expensive process. Every effort is made, however, to reduce the hardship resulting from delays. With less frequent resignations the conditions could be considerably improved.

The total number of applications pending before the Office is the dominant element in determining the amount of work which the force has to handle. Heretofore statements have been made in official reports of the number of applications filed per annum, but no showing has been made of the accumulation of applications in the Office.

During the month of February, 1912, a count was made by my predecessor as of January 1, 1912, of all of the applications then pending. Owing to the late date at which the count was attempted it showed fewer applications pending than should have been made to appear. The inaccuracy, however, does not probably affect the number of applications not in issue nor forfeited beyond two or three per cent. According to this count there were 108,000 applications, and it would be perhaps accurate for all practical purposes to reckon the number at that date—January 1, 1912—as 110,000. The first count made under the present administration—June 30, 1914—showed 116,832 applications pending and not in issue nor forfeited. This indicates increase in two and one-half years of about seven thousand applications—that is to say, during this time the number of applications pending and neither allowed nor forfeited increased at the rate of about three per cent per year. It was this steady increase which during many years created the accumulation of cases so much discussed as “delayed applications.”

It has been my earnest effort to induce attorneys and the Examiners to dispose of applications more promptly and it is a pleasure to be able to state that the count made at the close of business December 31, 1914, shows a decrease in these applications of almost seven thousand, the number being 109,846. This is a decrease in six months of about six per cent, or about twelve per cent per annum, against an increase heretofore of about three per cent per annum. In fact, 14,070 more applications were allowed in 1914 than in 1913. The effort to dispose of the cases instead of permitting them to drag along in the Office has necessitated much earnest work on the part of the force. I can not commend too highly the spirit which they have shown. The cooperation of the attorneys has also been gratifying.

Special attention has been given to the problem of bringing the long-pending applications to finality. The applications pending in the Office over fifteen years have been reduced from eighty-four on January 15, 1914, to thirty-seven at the date of this report. More would have been disposed of during the year were it not for the fact that twenty-eight of those remaining have the benefit of the law as it existed prior to January 1, 1898, under which response is required to an Office action only within two years. The number of applications pending in the Office over five years was reduced from 4,231 on June 30, 1914, to 3,621 on

December 31, 1914, and the number pending two years was reduced in the same time from 31,677 to 30,032. This rate of reduction will undoubtedly be much accelerated during the coming year.

It is my intention, if Congress will increase the number of Law Examiners, to assign one to the work of preventing unreasonable delay of applications in the Office. After June 30, 1915, no amendment can be filed in any application pending more than four years without being first called to the Commissioner's attention. I believe that it is possible with proper administration so to limit the time during which applications are kept in the Office that very few will exceed three years, and this without impairing an applicant's right to consideration of his case. However, as there were on January 1, 7,331 applications which had been in the Office four years or longer and as many more would become four-year cases during the current year if not properly expedited I have so far thought it unwise to attempt to deal with cases which have been pending less than four years.

The progress made toward eliminating the evil of long-delayed applications has been sufficiently encouraging to warrant the present belief that legislation is unnecessary.

In conclusion it may be stated that on an average applications which become patents are pending in the Office somewhat less than two years. During the first quarter of 1914 the average was 21.4 months. During the last quarter the average was 23.2 months. The rise in the time which applications are pending is due to the fact that the old applications are being passed out. During the first quarter of 1914, 392 five-year-old applications became patents, and during the last quarter of 1914 the number of patents issued on such applications was 724. As only 1,748 applications entered upon their sixth year during 1914, it is evident that at the present rate of issuance the number of five-year applications is being rapidly cut down.

CLASSIFICATION.

The primary function of the Patent Office is to ascertain and apply properly to any application for a patent all existing patents and literature which have a legitimate bearing adverse to the claims presented. To do this with any degree of success, it is essential that the domestic and foreign patents and the literature of the various arts collected in the Scientific Library be so classified and indexed as to enable the Examiners rapidly to find all existing patents and other publications bearing upon the application being searched. The system of classification which grew up in the Office prior to 1898 was found to be no longer adequate, and since that date a force of classifiers has been engaged in an attempt to work out a new and improved system of classification. Out of 1,123,210 United States patents, 540,000 have been assigned to their places under the new classification. It has been ascertained that each assistant in the Classification Division is able on an average to classify about 2,000 patents a year. This means that with the present force it would require about sixteen years to complete the classification. It has been estimated that if the force should be doubled the classification could be completed in seven years. To complete the classification within three

years would require an addition to the examining force of 75 men. This would involve an increase in the pay roll of about one hundred and fifty thousand dollars for classifiers, besides the necessary clerical assistance, which would probably increase it \$40,000 more. When the work was once accomplished, however, it would immensely increase the value to the public of the work done by the Office. Meanwhile the delay in the completion of the classification work impairs the work of the office to a serious extent.

During the year 1914 four additional classes were established, five classes were defined and definitions published, and a number of new subdivisions were established in both defined and undefined classes.

Nine classes have been revived and are now awaiting approval of the Examiner of Classification and the clerical work necessary to place them in condition for use. Three large classes are approaching completion, lacking the search for cross references. Eleven other classes are undergoing revision in the Classification Division in various stages toward completion.

In order to speed up the work, a plan has been evolved of having the classification made by the Examiners in the different divisions, with the cooperation and under the supervision of an assistant detailed from the Classification Division.

One class is approaching completion in Division IV by the efforts of an Assistant Examiner, who made the larger portion of the revision in the Classification Division.

Two assistants have been detailed to Divisions I and XXI, respectively, where they are continually engaged in examining, advising, and assisting in reclassification.

Two other assistants are advising and cooperating with the Examiners in Divisions XVII and XVIII, respectively, in revising the classification in those divisions, but spend a part of their time at their desks in the Classification Division.

There are now eighteen Assistant Examiners in the Classification Division. Two work in the division a part of their time. One is engaged all of his time in assigning disputed applications and verifying the classification of the weekly issue. Thus there are now fifteen assistants devoting their time to revision of the classification in this division, one to classification of pending applications and four devoting their time in whole or in part to examining divisions.

The work of classification takes men out of the examining divisions and by changing their line of work diminishes seriously their chance of promotion to the grade of Principal Examiner. Therefore men who have special ability in classification work are with some difficulty kept at this work, and if one of them secures a promotion to the grade of Principal Examiner he must be taken off of the classification work.

The Office will doubtless always require a classifying force of considerable size, and only men who are experienced searchers are competent to do practical classifying of good quality.

For all of these reasons it seems to me desirable that at least two positions of Principal Examiner should be established and the men appointed thereto be assigned to the work of classification.

TRADE MARK DIVISION.

This division examines both trade-marks and patents for designs. In both lines the work has been steadily increasing. Last year Congress created the position of First Assistant Examiner in the Trade-Mark Division. There should be at least one more First Assistant Examiner in this division, and a Second and Third Assistant Examiner as well, in order that this important and growing work may be properly cared for.

EXCHANGE OF PATENT COPIES WITH CANADA.

Shortly after assuming the duties of the Commissioner of Patents my attention was directed by the chief of the Patent Office of Canada to an agreement between the Canadian and United States Patent Offices for the exchange of copies of patents. Under this agreement the exchange of these copies began in the early part of 1899 and continued until September of that year, when it was suspended by the United States Patent Office. Upon examination of the correspondence between the two Governments and from conversations with the Hon. W. J. Lynch, chief of the Canadian Patent Office, who came to Washington in September, 1913, for this purpose, I found that there was no sufficient reason for the termination of the agreement on the part of the United States Patent Office. I accordingly directed the resumption of the exchange of these copies of patents, beginning with the issue of October 7, 1913, but in view of the very large number of copies of patents that must be drawn from the stock on hand to fill in between September of 1899 and October 7, 1913, I hesitated to direct the supply of these missing copies without the specific approval of Congress.

A joint resolution has been passed by Congress authorizing the exchange. A complete set of our classified patents will be delivered to the Canadian Patent Office at an early date under a suitable arrangement which has not yet been effected.

COMMITTEE ON RULES.

A committee on the revision of rules has been appointed, consisting of R. F. Whitehead, Assistant Commissioner; Fairfax Bayard, Examiner-in-Chief; H. E. Stauffer, Examiner of Interferences; E. S. Henry, Law Examiner; W. S. Ruckman, Albert Lewers, and L. A. Sadler, Primary Examiners, and Walter F. Rogers, attorney at law.

The committee has had five meetings and reports progress. It is to make a final report not later than June 30, 1915.

LEGISLATION.

(a) *Forfeited applications.*

Under section 4897 where a final fee is not paid within six months after notice of allowance the applicant has the right of renewal at any time within two years of the allowance of the original application. This is an unnecessarily long period and is one of the causes of delay in the issuance of patents. It is recommended that section 4897 be amended by changing into two years to one year, leaving the section otherwise as it now stands. This would bring the provision for renewal into accord with the provision of section 4894 requiring action by the applicant within one year from the date of any action by the office.

This period was formerly two years and was shortened by the act of March 3, 1897. Why section 4897 was not amended in the same way is not known.

(b) *Attorneys.*

It has been suggested many times that the privilege of practicing before the Office should be granted only after examination similar to examinations held for admission to the bar. It is believed that this requirement would be too severe, as many persons not specially trained in the law and without any particular educational advantages may by careful study of the practice and of the useful arts learn adequately to prosecute applications. Fundamentally, knowledge of the invention is more important than knowledge of the rules, and is often possessed by men of a type of mind which does not acquire legal knowledge readily.

It is of far more importance that the applicant be in actual touch with his attorney and that the relation established be one of mutual trust and confidence. Unfortunately a large amount of the business presented to the office originates from widespread advertisement and is accumulated by certain attorneys in such quantities that the relation of client and attorney can hardly be said to exist. Such attorneys have for many years used in their advertisements letters from Members of Congress and other officials of the Government recommending them. These recommendations, however guarded, are likely to impress people ignorant of the procedure with the idea that influence can be brought to bear upon the Patent Office to secure the allowance of patents. I feel very strongly that both the office and the public need to be protected against business originated in this way. I therefore recommend that an act be passed prohibiting the use of the name of any Member of either House of Congress or any official of the Government in advertising the business of any practitioner before the Patent Office.

(c) *Payment and refundment of fees.*

On pages 186, 187, and 188 of the Report of the Investigation of the United States Patent Office, made by the President's Commission on Economy and Efficiency in December, 1912 (62d Congress, 3d session, H. R. Document No. 110), will be found some valuable recommendations regarding the payment of fees into the Patent Office and the refundment of such fees as were paid by mistake or were in excess of what was required by law. The subjects therein discussed should receive congressional action in the interest of economy and efficient administration.

PAYMENT OF FEES.

Section 4935, R. S.

Patent fees may be paid to the Commissioner of Patents, or to the Treasurer, or any of the assistant treasurers of the United States, or to any of the designated depositories, national banks, or receivers of public money, designated by the Secretary of the Treasury for that purpose; and such officer shall give the depositor a receipt or certificate of deposit therefor. All money received at the Patent Office for any purpose, or from any source whatever, shall be paid into the Treasury as received, without any deduction whatever.

*Section 4935, R. S.
(Proposed amendment.)*

Patent fees shall be paid to the Commissioner of Patents, and the Commissioner, or such person as he shall depute, shall make daily deposits in some bank in the District of Columbia, to be designated by the Secretary of the Treasury for this purpose, of all moneys received as patent fees; and shall make deposits of such fees with the Treasurer of the United States, at such times and in such manner as the latter shall direct; and shall also make monthly reports in aggregate to the Secretary of the Treasury of all remittances received and moneys refunded.

The purpose of the proposed amendment to section 4935, Revised Statutes, is to eliminate the provision for payment by Treasury certificate of deposit. Less than 3 per cent of the patent fees are paid by certificate of deposit, and this method of payment is a source of confusion and trouble. Under the regulations of the Treasury Department these certificates, when issued, are forwarded by the depository to the Patent Office, and the depositor is therefore without means to control the actual time of payment into the Patent Office other than to receive the benefit of payment as of the date upon which the deposit is made.

The weekly issues of patents are made up of cases in which the final fees have been received by the Office not later than Thursday. Under the rules of the Patent Office the patents bear date as of the fourth Tuesday following the close of the issue, the intervening time being required to lithograph and engross the patent papers. It has happened in many cases that the failure to issue a patent upon a date arranged for by the inventor was due to the delay of the depository in forwarding to this Office the certificate of deposit. For instance, an inventor residing in Chicago will make a payment of his final fee at the subtreasury on Monday, expecting that the patent will be in the issue which closes on the following Thursday; but if the depository delays the transmission of this certificate until too late to reach the Office by Thursday the issue of the patent goes over one week, very often to the inconvenience and disappointment of the inventor, and it will be several days before the unfavorable condition becomes known to the inventor, at which time it will be too late to correct the error. In numerous other cases there has been a failure of the depository to date the certificate, and this necessitates correspondence and further delay in the issuance of the patent, for the fee can not be credited as having been paid unless the date of deposit thereof be shown.

When a certificate of deposit is used to pay the filing fee of an application, a bad situation sometimes arises. An inventor residing, say, in one of the Pacific Coast cities will lodge in this Office an application for patent, complete except as to the fee, and on the last day of the year within which he could make payment of the fee under the law he will make a deposit of the fee with a depository. Eight or ten days thereafter and after the expiration of the year the Office will receive the certificate, but must antedate the completion of the application to the date of the deposit of the fee. This requires that the application be given a fractional serial number and otherwise disarranges the continuity of our records. When a final fee is paid by an inventor under similar circumstances, it acts to prolong by eight or ten days the period during which the application is pending, contrary to the purposes of the law.

Payment by certificate of deposit is discriminatory and unfair to inventors residing in small places remote from Washington in that such inventors, not having access to a depository, are required to pay their fees, in the form of remittance by cash, bank draft, or money order, such a time in advance as to insure the receipt of the remittance within the lawful period. It is therefore apparent that section 4935, Revised Statutes,

should be amended so as to require all fees to be paid directly into the Patent Office.

REFUNDMENT OF FEES.

Section 4936, R. S.

The Treasurer of the United States is authorized to pay back any sum or sums of money to any person who has through mistake paid the same into the Treasury, or to any receiver or depository, to the credit of the Treasury, as for fees accruing at the Patent Office, upon a certification thereof being made to the Treasurer by the Commissioner of Patents.

Section 4936, R. S. (proposed amendment).

The Commissioner of Patents is authorized to refund any money to any person who has paid the same for fees to the Patent Office through mistake, or in excess, but no refundment of any money shall be made after the expiration of five years from the date of payment.

A decision of the Comptroller of the Treasury, dated November 23, 1911 (18 Comp. Dec., 368,) in the matter of refundments by the Patent Office, has placed upon the Office a very great burden, and has increased considerably the cost of administration. Prior to the decision referred to section 4936, Revised Statutes, was considered to have created an appropriation out of which the financial clerk of the Patent Office was authorized to refund such fees as were paid into the Office by mistake or in excess. The old practice is found to have been in operation for about forty years without question. Under the new practice the Patent Office certifies to the Treasury Department an abstract of all fees received by the Patent Office, including thousands of five-cent items. This abstract, which is made monthly, comprises between four hundred and five hundred pages and embodies the name of each remitter, his address, the purpose for which the fee was paid into the Office, and the amount thereof. After such abstract of fees received has been sent to the Treasury the Commissioner of Patents certifies to the Treasurer a list of the comparatively few cases wherein refundments of excess fees or fees paid by mistake are to be made. The certificate of refundment and the abstract of payments are audited, and thereafter a Treasury warrant for the amount to be refunded is drawn. About six thousand of such warrants are issued annually. Three-fourths of the number are for sums of less than one dollar. The number of warrants for five cents each run into the hundreds. The gross receipts of the Patent Office for the year ended December 31, 1914, were \$2,264,419.76, and the refundments during the same year amounted to \$12,526.94. This method of auditing and refunding by warrants through the Treasury is estimated to cost one dollar for each transaction—that is, for each warrant—so that, to quote from the report (p. 187) mentioned—

it will be seen that while the practice established under the ruling of the Comptroller conforms to the requirement of the law, the expense is out of proportion to the benefits.

The Commission referred to recommended that the law be amended so as to authorize refundments to be made by the Patent Office.

In view of the fact that persons who pay money into the Patent Office by mistake or in excess of the amount required are notified promptly that refundment will be made upon request it is believed that there should be some limitation upon the time within which such refundments can be made. For this reason it is proposed to add to section 4936, as amended, a provision that refundments on account of fees paid by mistake or in excess shall not be made after the expiration of five

years from the date of payment. This limitation will enable the office to close its transactions and not be required to make reference to records which in future years may not be available. A requirement that refundment shall be made within a reasonable and definite time after payment will also eliminate the liability to make duplicate refundments.

These items enter very largely into the operations of the Patent Office, and the public business will be facilitated, at a reduced cost, if sections 4935 and 4936, Revised Statutes, are amended in the particulars pointed out.

(d) Assignments.

One of my predecessors—Commissioner Benton J. Hall—in his annual report to Congress for the year 1887 said:

Section 4898 provides that an assignment, grant, or conveyance shall be void as against any subsequent purchaser or mortgagee for a valuable consideration without notice unless such instrument be recorded in the Patent Office within three months from the date thereof. In my opinion, this requirement operates unjustly in providing that an assignment, if recorded after three months from the date thereof, shall have no effect as constructive notice to a subsequent purchaser or mortgagee for a valuable consideration. The provision in my judgment should be modified so as to declare that while the assignment should be valid without recording for the period of three months from and after its date, thereafter it should be void against subsequent purchaser or mortgagee for a valuable consideration without notice, unless it be recorded in the Patent Office prior to the date of such subsequent purchase or mortgage, so that should the assignee fail through forgetfulness or accident to file his instrument or assignment within three months he might still file it for record at a subsequent period, and it should then give constructive notice from the date of its actual filing.

I concur in the views expressed here and the suggested amendment to the law to carry it into effect.

Under section 4934 of the Revised Statutes, originally enacted in 1870, the maximum fee for recording each "assignment, agreement, power of attorney, or other paper" was three dollars. Assignments have been and are now being received and recorded weekly that embody hundreds of patents and thousands of words. Recently, for example, there were recorded eight writings, three of which contained 966 patents, applications, and trade-marks, and the legal fees for recording the eight writings were thirty dollars under the Revised Statute mentioned, as amended May 27, 1908. The actual time occupied by the clerical force in verifying and supplying missing data of these patents, digesting, indexing, recording, and comparing was 172 hours, equivalent to the time of one clerk for twenty-four and four-sevenths days. At a minimum fee of fifty cents per hour legally chargeable for this class of work the cost to the office for recording these writings was eighty-six dollars, nearly three times the amount paid therefor.

In addition to the number of words in writing presented for record, a nominal fee for each additional patent, application, design, trade-mark, or invention enumerated therein should, in my judgment, be charged. It is therefore suggested that 25 cents be charged for each of said additional items. I may add that this recommendation was included in the report to Congress of the investigation of the United States Patent Office by the President's Commission on Economy and Efficiency in December, 1912, and reference is made therein to this matter on pages 185-196.

It is therefore recommended that section 4934 be suitably amended to provide for this change in fees. A proper amendment will be submitted at an early date for consideration of Congress.

(e) Assignees' index.

In 1870 a special appropriation was made by Congress for the purpose of indexing all prior recorded deeds, assignments, etc., under the name of the inventor, and all assignments recorded since that date have been so indexed. Under this law, pursuant to the records established thereby, it is necessary to know at least the name of the applicant or inventor to make the necessary search to run down a chain of title. Experience has shown that it is frequently necessary or desired by attorneys, inventors, and the general public to ascertain what patents are owned by a particular individual, firm, or corporation.

There is no authentic manner at present in which such search can be made except in each of the volumes wherein are recorded assignments and the data of the application, where they are indexed from assignor to assignee. It is therefore very desirable that a consolidated assignees' index be established and kept up to date in the Patent Office for this purpose. Requests are frequently made for such an authentic, verified, and checked index from which a reliable search may be made to ascertain what patents are owned by given corporations, firms, or individuals. To perform this service it is believed that three more index clerks will be required in addition to those now employed in the Assignment Division, and for the indexing covering the past 17 years five or six additional clerks will probably be needed to bring up its arrearage within a reasonable time.

I will therefore submit at an early date to Congress a request for authority to establish this index and a request for additional clerks for this purpose.

(f) Clerks of courts to file decrees.

I would also suggest that the law be amended to require the clerks of the Federal courts to file in this Office a copy of every decree granting or refusing an injunction in a suit for infringement of a patent and every final decree affecting the validity of a patent.

If such copies were filed in this office and placed in the file of the patent, it would enable any one to determine the litigation in which this patent had been involved, a thing which is now practically impossible, since many of the decisions of the lower courts are not published.

(g) Protection of designs.

The present method of protecting designs is cumbersome and so costly that designers make little use of it. The problems of a court in passing upon the validity and infringement of design patents are so simple, generally speaking, as not to require the assistance of expert opinion. Little or nothing, therefore, is gained by examination prior to the granting of a patent. It is recommended that protection of designs

be put upon a registration basis and the fees be greatly reduced.

(h) Witnesses to applications.

Section 4888 of the Revised Statutes, requiring that the signature of the inventor to the specification and claims be attested by two witnesses, and section 4889 of the Revised Statutes, requiring that the signature of the inventor or his attorney in fact to the drawing be attested by two witnesses, involve this office in a great deal of work, and frequently the omission of the signature of a witness postpones the filing date of an application for patent. In many other cases it necessitates the filing of substitute specifications, properly witnessed, and this imposes upon the office the entirely unnecessary work of carefully comparing the substitute specification with the original to guard against errors and omissions, as well as departures from the original disclosure.

In some cases the return of a drawing for the addition of the signature of a witness has resulted in the loss of the drawing and sometimes in the mutilation thereof to such a degree as to necessitate a new drawing. Yet, as far as I can ascertain upon inquiry, no witness has ever been called into court to verify his signature.

The oath can readily be amended to contain an acknowledgment of the signature to the specification. This seems to me to be sufficient, and I therefore suggested an amendment to the sections of law referred to, omitting the requirement as to witnesses to signatures.

A bill embodying the proposed amendment has passed the House and has been reported favorably by the Senate Committee on Patents.

(i) Subpœna duces tecum.

The present statute does not provide for *subpœna duces tecum* in interference cases. This remedy should be provided by amending section 4906 of the Revised Statutes by adding thereto the statement that the provisions of section 869 of the Revised Statutes with relation to the issuance of a *subpœna duces tecum* shall apply to contested cases in the Patent Office.

(j) Exhibitors at the Panama-Pacific International Exposition.

An act has been passed by Congress for the protection of exhibitors at San Francisco. Pursuant to this act a branch office has been open since the 1st day of July, 1914; but no application has been made up to the date of this report for registration of a patent or a trade-mark under the act.

Respectfully submitted.

THOMAS EWING,
Commissioner of Patents.

ALPHABETICAL LIST

OF

PATENTEES FOR THE YEAR 1914.

[Patentees of Designs, Trade-Marks, Labels, and Prints, and parties who have filed Disclaimers follow this in separate indexes, but precede the Alphabetical List of Inventions.]

[Abbreviations: "Gaz."—Official Gazette.]

 Edison, Thomas A., Llewellyn Park, assignor to New Jersey Patent Company, West Orange, N. J. Making molds for sound-records. No. 1,118,114; Nov. 24; Gaz. vol. 208; p. 1043.
 Edison, Thomas A., Llewellyn Park, assignor to New Jersey Patent Company, West Orange, N. J. Sound-reproducer. No. 1,119,141; Dec. 1; Gaz. vol. 209; p. 84.
 Edison, Thomas A., Llewellyn Park, assignor to New Jersey Patent Company, West Orange, N. J. Sound-record. No. 1,119,142; Dec. 1; Gaz. vol. 209; p. 85.
 Edison, William L. (See Palmer, Harry B., assignor.)
 Edlavitch, Charles J., assignor of one-half to A. Burdwise, Baltimore, Md. Violin chin-rest. No. 1,094,984; Apr. 28; Gaz. vol. 201; p. 1112.
 Edlin, George S., Makino, near Palmerston North, New Zealand. Propulsion of vessels. No. 1,117,351; Nov. 17; Gaz. vol. 208; p. 737.
 Edman Car Door Company. (See Edman, John, assignor.)
 Edman, John, assignor to Edman Car Door Company, Minneapolis, Minn. Lock for car-doors. No. 1,112,899; Oct. 6; Gaz. vol. 207; p. 170.
 Edman, John, and E. Eck, Minneapolis, Minn. Anchoring device for boats. No. 1,109,052; Sept. 1; Gaz. vol. 206; p. 70.
 Edmands, Artemas B., Milford, Mass. Knot-tying device. No. 1,112,367; Sept. 29; Gaz. vol. 206; p. 1392.
 Edmands, John W., Newton Center, Mass., assignor to Central Railway Signal Company, Pittsburgh, Pa. Railway signal-fusee. No. 1,103,277; July 14; Gaz. vol. 204; p. 415.
 Edmands, John W., Newton Center, Mass., assignor to Central Railway Signal Company, Pittsburgh, Pa. Railway signal-fusee. No. 1,103,278; July 14; Gaz. vol. 204; p. 415.
 Edmands, John W., Newton Center, Mass., assignor to Central Railway Signal Company, Pittsburgh, Pa. Fusee-cap. No. 1,103,279; July 14; Gaz. vol. 204; p. 416.
 Edmison, George A. and L., Los Angeles, Cal. Electrical heater. No. 1,088,887; Mar. 3; Gaz. vol. 200; p. 73.
 Edmison, Laurence. (See Edmison, George A. and L.)
 Edmiston, John D., Cave Springs, Ark., assignor to H. H. Dunlap, Oklahoma, Okla. Elastic cement. No. 1,122,883; Dec. 29; Gaz. vol. 209; p. 1545.
 Edmonds, Samuel O., New York, N. Y., assignor to A. B. Dick Company, Chicago, Ill. Stenciling material. No. 1,101,262; June 23; Gaz. vol. 203; p. 1128.
 Edmonds, Samuel P., Catonsville, Md. Amusement puzzle-box. No. 1,090,139; Mar. 17; Gaz. vol. 200; p. 591.
 Edmonds, Samuel P., Catonsville, Md. Life-saving appliance. No. 1,110,614; Sept. 15; Gaz. vol. 206; p. 704.

Alphabetical list of patentees—Continued.

- Edmonds, Thomas H., Washington, D. C. Car-ticket, stamp, and card holder. No. 1,089,117; Mar. 3; Gaz. vol. 200; p. 152.
- Edmonds, Walter D. (See Ladoff, Isador, assignor.)
- Edmondson, E. A., *et al.* (See Taylor, Nicholas, assignor.)
- Edmondson, George A., *et al.* (See Collier, George M., assignor.)
- Edmondson, Lagrange V. (See English and Edmondson.)
- Edmondson, Thomas R., assignor of one-half to E. G. Sporleder, Tucson, Ariz. Vehicle-bed. No. 1,107,596; Aug. 18; Gaz. vol. 205; p. 797.
- Edmondson, Thomas R., assignor of one-half to E. G. Sporleder, Tucson, Ariz. Vehicle-bed. (Reissue.) No. 1,3805; Oct. 6; Gaz. vol. 207; p. 266.
- Edmund and Jones Manufacturing Company. (See Godley, Charles E., assignor.)
- Edmunds, William H., Leesburg, Va. Lighting apparatus. No. 1,102,022; June 30; Gaz. vol. 203; p. 1445.
- Edmunds, William H., Leesburg, Va. Grease-gun-filling device. No. 1,110,909; Sept. 15; Gaz. vol. 206; p. 809.
- Edqvist, Olof F., Denver, Colo. Rotary gas-engine. No. 1,108,152; Aug. 25; Gaz. vol. 205; p. 1038.
- Edqvist, Olof F., Denver, Colo. Rotary explosive-engine. No. 1,108,980; Sept. 1; Gaz. vol. 206; p. 43.
- Edsall, Irving L., and E. T. Molzahn, Superior, Nebr. Podder-mealing machine. No. 1,097,919; May 26; Gaz. vol. 202; p. 1070.
- Edsall, William H., Wallingford, Conn. Curtain-support. No. 1,085,895; Feb. 3; Gaz. vol. 199; p. 112.
- Edsall, William H., and F. L. Lathrop, assignors to H. L. Judd Company, Wallingford, Conn. Spring-socket for curtain-rods. No. 1,095,718; May 5; Gaz. vol. 202; p. 186.
- Edstrom, Karl A., assignor of two-fifths to O. Halkowicz, Denver, Colo. Mechanism for delineating cross-section contours. No. 1,095,317; May 5; Gaz. vol. 202; p. 49.
- Edward F. Caldwell & Co. (See Tizley, Arthur J., assignor.)
- Edward, John B. (See Rutty and Edward.)
- Edward Katzinger Company. (See Cohn, Albert, assignor.)
- Edward Manufacturing Company, The. (See Lindmueller, Edward, assignor.)
- Edward Miller & Company. (See Schoenhardt, Ferdinand P., assignor.)
- Edward Packard and Company. (See Mills and Packard, assignors.)
- Edwards, Alonzo L., assignor to Wheeling Stamping Company, Wheeling, W. Va. Lantern. No. 1,113,107; Oct. 6; Gaz. vol. 207; p. 239.
- Edwards, Arthur L., Lewistown, Mont. Drill-bit. No. 1,113,968; Oct. 20; Gaz. vol. 207; p. 625.
- Edwards, Arthur W. (See Collier and Edwards.)
- Edwards, Bruce V., assignor to Edwards Engineering & Manufacturing Company, Newark, N. J. Music-roll. No. 1,122,706; Dec. 29; Gaz. vol. 209; p. 1482.
- Edwards, Charles, Gouldsboro, Pa. Oar-lock. No. 1,120,799; Dec. 15; Gaz. vol. 209; p. 744.
- Edwards, Charles R., Pekin, Ill. Pump. No. 1,084,413; Jan. 13; Gaz. vol. 198; p. 412.
- Edwards & Co. (See Lungen, Adam, assignor.)
- Edwards, Daniel W., assignor to Greenlee Bros. & Company, Rockford, Ill. Tool. No. 1,105,553; July 28; Gaz. vol. 204; p. 1294.
- Edwards, Edward W., Cincinnati, Ohio. Sheet-metal roofing. No. 1,091,049; Mar. 24; Gaz. vol. 200; p. 937.
- Edwards Engineering & Manufacturing Company. (See Edwards, Bruce V., assignor.)
- Edwards, Eugene P., assignor of one-half to said Edwards and one-half to A. S. Giles, Plainfield, N. J. Universal joint. No. 1,098,101; May 26; Gaz. vol. 202; p. 1133.
- Edwards, George, Brussels, Ontario, Canada. Ditching-machine. No. 1,113,318; Oct. 13; Gaz. vol. 207; p. 359.
- Edwards, George S., Greencastle, Pa. Dental instrument. No. 1,092,701; Apr. 7; Gaz. vol. 201; p. 198.
- Edwards, Harry C., assignor of one-half to J. T. Megredy, Kansas City, Mo. Vehicle-jack. No. 1,090,781; Mar. 17; Gaz. vol. 200; p. 812.
- Edwards, Henry E., *et al.* (See Baines, Henry C., assignor.)
- Edwards, Henry F. (See Mesker, Edwards, Smith, Stephens, and Seele.)
- Edwards, Herbert A., London, and E. A. Shilling, Barnet, assignors to Dental Manufacturing Company, Limited, London, England. Dental pin for artificial teeth. No. 1,083,893; Jan. 6; Gaz. vol. 198; p. 205.
- Edwards, Isaac L., Aurora, Ill. Buckle for traces, &c. No. 1,087,742; Feb. 17; Gaz. vol. 199; p. 850.
- Edwards, Isaac L., Aurora, Ill. Combined tie-plate and brace. No. 1,091,050; Mar. 24; Gaz. vol. 200; p. 937.
- Edwards, Isaac L., Aurora, Ill. Automatic engineer's signal. No. 1,095,388; May 5; Gaz. vol. 202; p. 73.
- Edwards, James B., assignor of one-half to A. M. Gibbes, Columbia, S. C. Grate-bar. No. 1,096,697; May 12; Gaz. vol. 202; p. 553.
- Edwards, Jessie V., Beeville, Tex. Stalk-cutter. No. 1,097,617; May 26; Gaz. vol. 202; p. 960.
- Edwards, Jessie V., Beeville, Tex. Plow. No. 1,097,920; May 26; Gaz. vol. 202; p. 1070.
- Edwards, Joseph B., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Strengthening receiver-shells. No. 1,115,519; Nov. 3; Gaz. vol. 208; p. 18.
- Edwards, Joseph B., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Receiver-shell. No. 1,115,520; Nov. 3; Gaz. vol. 208; p. 18.
- Edwards, Joshua L., *et al.* (See Greene, James O., assignor.)
- Edwards & Loomis Co. (See Baudoin, Louis A., assignor.)
- Edwards, Ogden E., Jr., New York, N. Y., assignor to The J. G. Brill Co., Philadelphia, Pa. Car-truck. No. 1,118,336; Nov. 24; Gaz. vol. 208; p. 1120.
- Edwards, Oliver M. (See Axe, Roy T., assignor.)
- Edwards, Oliver M. (See Axe and Edwards.)
- Edwards, Oliver M. (See Chaffee, Edward F., assignor.)
- Edwards, Oliver M. (See Mugnier, Raymond, assignor.)
- Edwards, Oliver M. (See Netter, Raphaël, assignor.)
- Edwards, Oliver M. (See Ohnstrand, Enoch, assignor.)
- Edwards, Oliver M. (See Stuck, Everett, assignor.)
- Edwards, Oliver M., Syracuse, N. Y. Sash-holding device. No. 1,096,813; May 12; Gaz. vol. 202; p. 593.
- Edwards, Oliver M., Syracuse, N. Y. Window-sash holding device. No. 1,100,820; June 23; Gaz. vol. 203; p. 975.
- Edwards, Oliver M., Syracuse, N. Y. Trap-door lock for railway-cars and similar structures. No. 1,113,547; Oct. 13; Gaz. vol. 207; p. 440.
- Edwards, Oliver M., Syracuse, N. Y. Trap-door for railway-cars and similar structures. No. 1,119,940; Dec. 8; Gaz. vol. 209; p. 393.
- Edwards, Pearl M. (See Campbell, Calvin N., assignor.)
- Edwards, Victor E., assignor to Morgan Construction Company, Worcester, Mass. Rolling-mill plant. No. 1,104,349; July 21; Gaz. vol. 204; p. 826.
- Edwards, Whitfield H., Tamina, Tex. Nut-lock. No. 1,105,763; Aug. 4; Gaz. vol. 205; p. 62.
- Edwards, William, Winnipeg, Manitoba, Canada. Safety lock-shoe for rails. No. 1,099,288; June 9; Gaz. vol. 203; p. 358.
- Edwards, William C., Jr., Kansas City, Mo. Reinforcement and centering. No. 1,094,985; Apr. 28; Gaz. vol. 201; p. 1112.
- Edwin B. Stimpson Company. (See Stimpson, Edwin B., assignor.)
- Edwin, Emil. (See Troye and Edwin.)
- Edwin, Emil, M. Hähle, and B. Strasser, Ludwigshafen-on-the-Rhine, Germany, assignors to Norsk Hydro-Elektrisk Kvaestofaktieselskab, Christiania, Norway. Carrying out chemical reactions in gases by means of electric arcs. No. 1,111,301; Sept. 22; Gaz. vol. 206; p. 986.
- Edwin Harrington, Son & Co. (See Harrington and Scott, assignors.)
- Edwin Harrington, Son & Company. (See Scott, Robert F., assignor.)
- Eek, Albin C., Webster Groves, assignor to J. C. Streett and G. H. Shields, Jr., St. Louis, Mo. Pipe-cleaner. No. 1,099,541; June 9; Gaz. vol. 203; p. 446.
- Eells, Henry B., and I. H. Kaufman, assignors to James Beggs & Co., New York, N. Y. Filter connection. No. 1,108,153; Aug. 25; Gaz. vol. 205; p. 1038.
- Egan, James, Chicago, Ill. Wrecking-truck. No. 1,116,579; Nov. 10; Gaz. vol. 208; p. 425.
- Egan, James H., and J. H. Frierson, Charleston, S. C. Slot-machine. No. 1,084,076; Jan. 13; Gaz. vol. 198; p. 301.
- Egan, Mathew M., Fort Worth, Tex. Food-mixer. No. 1,095,719; May 5; Gaz. vol. 202; p. 186.
- Egan, Michael F. (See Loney and Egan.)
- Egan, Patrick. (See Hipwood and Egan.)
- Eger, Mary, Syracuse, N. Y. Flower-box. No. 1,084,414; Jan. 13; Gaz. vol. 198; p. 412.
- Egerton, Charles O., assignor to Hudson Motor Car Company, Detroit, Mich. Gasolene-gage. No. 1,109,669; Sept. 8; Gaz. vol. 206; p. 327.
- Egerton, Henry C., Passaic, N. J., assignor to Western Electric Company, New York, N. Y. Telephone transmission-circuits. No. 1,089,825; Mar. 10; Gaz. vol. 200; p. 443.
- Egerton, Henry C., Passaic, N. J., assignor to Western Electric Company, New York, N. Y. Train-despatcher's telephone-circuit. No. 1,110,913; Sept. 15; Gaz. vol. 206; p. 810.
- Egerton, Henry C., Ridgewood, N. J., assignor to Western Electric Company, New York, N. Y. Loud-speaking transmitter. No. 1,111,253; Sept. 22; Gaz. vol. 206; p. 970.
- Eggart, Karl, assignor to Firm of A. Saurer, Arbon, Switzerland. Jacquard embroidery-machine. No. 1,101,263; June 23; Gaz. vol. 203; p. 1129.
- Eggart, Karl, assignor to Firm of A. Saurer, Arbon, Switzerland. Jacquard-card-perforating machine. No. 1,104,641; July 21; Gaz. vol. 204; p. 927.
- Eggart, Karl, assignor to Firm of A. Saurer, Arbon, Switzerland. Jacquard-card-perforating machine. No. 1,108,492; Aug. 25; Gaz. vol. 205; p. 1157.
- Eggart, Karl, assignor to Firm of A. Saurer, Arbon, Switzerland. Jacquard embroidery-machine. No. 1,118,115; Nov. 24; Gaz. vol. 208; p. 1044.
- Eggart, Karl, assignor to Firm of A. Saurer, Arbon, Switzerland. Machine for punching jacquard-cards. No. 1,118,481; Nov. 24; Gaz. vol. 208; p. 1173.

Alphabetical list of patentees—Continued.

- Eggers, Alfred C., assignor to C. A. Tyrrell, New York, N. Y. Rectal syringe. No. 1,087,935; Feb. 24; Gaz. vol. 199; p. 961.
- Eggers, Anton C., New York, N. Y., assignor to Good-year's India Rubber Glove Mfg. Co., Naugatuck, Conn. Hot-water bottle. No. 1,116,683; Nov. 10; Gaz. vol. 208; p. 463.
- Eggers, Ferdinand, Denver, Colo. Quick-adjustment wrench. No. 1,117,173; Nov. 17; Gaz. vol. 208; p. 672.
- Eggers, Walter, Baltimore, Md. Attachment for trolley-harps. No. 1,118,847; Nov. 24; Gaz. vol. 208; p. 1297.
